

We have a vast range of diverse stock available, here are just a few of our most popular and commonly used paper and boards. If you would like samples, details or advice on any other available stock please don't hesitate to contact us.

9lives 55

9lives 55 is a FSC certified coated paper and board range, manufactured with a 55% recycled fibre content.

The range provides the same visual and mechanical performance as similar 100% virgin fibre papers and offers excellent environmental attributes.

Features and Benefits

- Available in sheets and reels
- Bright white shade - excellent ink to paper contrast
- Smooth surface - superb reproduction
- Sustainable 55% recycled product with excellent environmental attributes
- Competitively price alternative to totally virgin grades

9lives 80

Certified as an FSC mixed sources product; using 20% recycled wood and fibre, 60% FSC certified de-inked fibre recovered from post-consumer sources, 10% FSC accredited virgin TCF fibre and 10% virgin fibre from sustainable forests.

Features and Benefits

- Bright white shade - excellent ink to paper contrast
- Smooth surface - superb reproduction
- Sustainable recycled product with excellent environmental attributes
- Same visual and mechanical performance as similar 100% virgin fibre papers

9lives Office

9lives Office is an 'everyday' office paper offering superb performance on copiers, laser and inkjet printers and the ultimate in caring environmental credentials, manufactured entirely from recycled paper.

Features and Benefits

- Manufacturer is endorsed by Greenpeace and packaging displays this endorsement
- 100% recycled fibre content
- Blue Angel and Nordic Swan accredited
- NAPM certified recycled product
- Natural white shade

9lives Envelopes

Range of premium envelopes that compliment the 9lives Business range of papers.

Manufactured from 100% post consumer recycled paper. Available in DL, C4 and C5 encompassing self seal or gummed, window or non window, wallet or pocket.

9lives Offset

Offers the ultimate in environmental credentials and is manufactured from FSC certified 100% recycled fibre.

Its high white shade, high bulk and excellent opacity make it the perfect choice for general commercial printing where uncoated stock is the preferred choice.

It delivers outstanding consistency and an excellent sheet formation.

Features and Benefits

- 100% recycled paper
- Excellent sheet formation and high bulk
- High white shade and good opacity
- Matching paper and board
- Suitable for archival use
- Ideal for all kinds of books

9lives Business

Offers the ultimate in environmental credentials, being manufactured from 100% post-consumer recycled fibre in the UK.

In addition to its lower carbon footprint on transport, 9lives Business has outstanding whiteness, high bulk with good opacity. It is the perfect choice for general commercial printing plus is guaranteed for litho-preprinting and subsequent laser overprinting.

Features and Benefits

- 100% post-consumer recycled paper
- Outstanding whiteness and brightness
- Good bulk and opacity
- Excellent sheet formation
- Vibrant ink lift and superior results

Advocate Smooth

Advocate Smooth paper and board has a new silky smooth surface, offering tactile opulence and optimum print production. The range is available in FSC accredited Xtreme. White and a softer Natural shade.

Features and Benefits

- FSC Certified range (Xtreme White) with minimum 30% FSC material
- Guaranteed in paper weights for all traditional print processes
- Guaranteed for mono & colour laser & inkjet printing
- High quality silky smooth finish
- Suitable for archival storage
- Matching envelopes compliment the range

Chromomat Paper & Board

Chromomat is the superior chlorine free matt coated paper for all documents carrying a large amount of text. Its high whiteness and unrivalled smooth surface emphasise the contrast between image intensity and its brilliant white surface and opacity.

Legibility and a unique print finish is achieved due to the excellent printing contrast from solid ink coverage.

A very short drying time, allowing ink rub resistance, enables excellent reproduction results with outstanding contrasts.

Features and Benefits

- True matt finish
- Excellent multicolour printing qualities
- High white shade for excellent printing contrast
- Excellent runnability
- HP Indigo guaranteed
- Laser compatible
- Good finishing capability
- Good readability, minimal show through

ChromomatIvoire

ChromomatIvoire has all the same physical characteristics as Chromomat but with the added benefit of a sophisticated 'Ivory' shade. Text is enriched, bringing character and refinement to prestige documents.

Features and Benefits

- True matt paper and board range with good printing qualities
- Sophisticated 'Ivory' shade
- Good readability, minimum show through
- Excellent runnability
- Good finishing capability

Colorplan - G F Smith

Colorplan is a unique range of papers and boards in 52 colours and 8 grammages. Available in a plain finish and can be embossed to order with a choice of 23 embossing patterns, Colorplan can also be paste laminated in various colour combinations.

Features and Benefits

- Unique short run embossing to order
- Can be paste laminated with various combinations
- Suitable for archival storage
- Matching envelopes available
- Acid Free colours are: Bright White, China White, Ice White, Natural, Pristine White and Vellum White

Fasson Crack-Back Plus

Fasson is a market leading range of self adhesive sheets. Crack Back Plus is mechanically crush-scored diagonal lines across the backing paper for ease of removal.

Available in a choice of adhesive types, Fasson Crack-Back Plus can easily be both kiss-cut and die cut, ensuring easy removal of backing paper from the smallest stickers.

All surfaces should be dry, clean, free from dust, corrosion and grease. If in doubt test the surface using samples material.

Substrates suitable for Fasson self-adhesive products:

Glass
Bare Metal
Soft and Rigid PVC
Paint and Varnish
Coated Papers
Cardboard
Natural Wood

Fasson Scoreback

Fasson Scoreback is a range of self-adhesive sheets with parallel scorelines across the backing sheet for ease of removal.
